|  | -  | Phillip Ga           |  | 1644                             |  |  |  |  |  |
| The MAILING DATE of this communication appears on the cover sheet with the correspondence address<br>Period for Reply  |  |                      |  |                                  |  |  |  |  |  |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). |  |                      |  |                                  |  |  |  |  |  |

اً. . الر

Application/Control Number: 10/015,832

Art Unit: 1644

## **DETAILED ACTION**

- 1. Restriction to one of the following inventions is required under 35 U.S.C. '121:
- I. Claims 1-17, drawn to methods of treating an antibody-related disease, an autoimmune disease or a chronic immune system disorder inflammation with CD40L-specific compounds, classified in Class 424, subclass 130.1.
- II. Claims 18-23, drawn to methods of inhibiting transplant rejection with CD40L-specific compounds, classified in Class 424, subclass 130.1
- III. Claim 24, drawn to methods of suppressing an immune reaction to a transgene product with CD40L-specific compounds, classified in Class 424, subclass 130.1
- 3. Inventions I / II / III are different methods which require different ingredients, process steps and endpoints. Therefore, they are patentably distinct.
- 4. Because these inventions are distinct for the reasons given above and the search required for any group from Groups I-III is not required for any other group from Groups I-III and Groups I-III have acquired a separate status in the art because the searches are not co-extensive and encompass divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. This application contains claims directed to the following patentably distinct species of the claimed Group I: wherein the disease or disorder is:
  - A) SLE.
  - B) myasthenia gravis,
  - C) autoimmune hemolytic anemia,
  - D) ITP.
  - E) anti-phospholipid syndrome,
  - F) psoriasis...
  - G) allergy,
  - H), arthritis or
  - I) multiple sclerosis.

These species are distinct because the pathological conditions differ in etiologies and therapeutic endpoints.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Application/Control Number: 10/015,832

Art Unit: 1644

6. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. '1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. '809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

- 7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
- 9. It is noted that if applicant intends to recite or to encompass anti-CD40L compounds, other than anti-CD40L antibodies, then such anti-CD40L compounds will be subject to further Restriction. It is noted that pages 6-8 of the instant specification appears to disclose only anti-CD40L antibodies as anti-CD40L compounds.

Application/Control Number: 10/015,832

Art Unit: 1644

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gambel whose telephone number is (571) 272-0844. The examiner can normally be reached Monday through Thursday from 7:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.

The fax number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
